OVERVIEW

World Acid, established in 2017, is a leading industrial chemical manufacturer based in Sulaymaniyah, delivering high-purity solutions to different sectors across Iraq and the region. Defined by precision, reliability, and control, we combine advanced production capabilities with a robust supply chain to ensure consistent quality at scale. Our commitment is simple: to power industry with chemicals our partners can trust every time.

INVESTMENT HIGHLIGHTS

- 92,000+ tons annual production capacity for all products
- 6,800 tons storage capacity
- 99.5% operational reliability (24/7 operations)
- 16 dedicated tanker fleet (stainless steel & FRP)
- 100+ industrial clients served
- Delivery within 24–48 hours across Iraq

VISION

To become a leading industrial chemical solutions provider in Iraq and the MENA region, recognized for quality, reliability, and large-scale supply capabilities.

MISSION

To deliver high-quality chemical products and integrated supply solutions that enhance industrial efficiency, ensure safety, and support sustainable growth.

CORE VALUES

RELIABILITY

We ensure continual supply chains to support continuous industrial operations.

EXPERTISE

Deep industry knowledge over 9 years enabling us to support complex industrial requirements in chemical products and sourcing.

SAFETY

Strict Adherence to safety procedures including storage, handling, and transportation.

OUR STORY

FOUNDER'S EXPERIENCE & ORIGINS

○ 2010 – 2011 | Foundation Phase

The company's journey began with the owner initiating work in the chemical sector, sourcing raw materials from outside Iraq and supplying them to local industries.

○ 2013 – 2014 | Establishment of Golden Acid

A company was officially established under the name Golden Acid Company in Sulaymaniyah and it was completed at the end of 2014. A factory dedicated to the production of Hydrochloric Acid was built in Kirkuk at the same time, and it is producing about 50 Ton daily since that time.

○ 2014 – 2017 | Trading & Market Expansion

During this period, the company focused on chemical trading, local distribution, and Manufacturing materials, strengthening its presence in the industrial chemicals market.

○ 2017 | Launch of World Acid

World Acid was established, marking a new phase of growth and industrial expansion.

○ 2018 – 2020 | Sulfuric Acid Factory Development

Construction of a sulfuric acid production facility began, leading to full operational capacity in 2020.

○ 2020 | Start of Full Production

The sulfuric acid factory reached full production, with a capacity of:

- 70 tons per day
- 25,550 tons annually

○ 2021 – 2025 | Expansion of Hydrochloric Acid Production

Hydrochloric acid factory became fully operational, achieving:

- 50 tons per day
- 18,250 tons annually

○ 2025 – Present | Growth & Increased Production Capacity

Continuous upgrades and technological improvements across all facilities have significantly increased production capacity. Today, the company produces:

- About 47,000 tons/year of sulfuric acid
- 36,000 tons/year of hydrochloric acid
- About 9,000 tons/year of potassium sulfate

Today, the company operates three branches across the region, with a presence in Iraq, Turkey, and the UAE, reflecting its continued regional expansion and commitment to serving growing markets.

INDUSTRIES WE SUPPORT

World Acid operates as an integrated manufacturer and industrial chemical supplier, combining in-house production with strategic sourcing to ensure continuous, large-scale supply across Iraq's key industries. Our core production includes sulfuric acid, hydrochloric acid, and potassium sulfate, complemented by controlled sourcing to meet additional client requirements.

We support critical sectors with reliable, specification-grade chemical supply:

- **Power Generation & Energy Plants** – Supplying high-purity chemicals essential for boiler treatment, cooling systems, and efficient energy production processes. (**Sulfuric Acid – H₂SO₄**)
- **Oil Refineries, Gas Treatment & Petrochemical Industries** – Supporting refining, desulfurization, and processing operations with reliable, specification-grade chemical solutions. (**Sulfuric Acid – H₂SO₄, Hydrochloric Acid – HCl**)
- **Water Treatment & Purification Systems** – Providing chemicals used in pH control, purification, and safe water management for industrial and municipal applications. (**Sulfuric Acid, Hydrochloric Acid – HCl**)
- **Agricultural & Fertilizer Production** – Enabling fertilizer manufacturing and soil treatment solutions that enhance agricultural productivity. (**Potassium Sulfate – K₂SO₄**)
- **Industrial Manufacturing & Chemical Producers:**
Delivering consistent, high-quality inputs required for large-scale production and specialized chemical processes, including the production of aluminum sulfate, fertilizers, and car batteries (**H₂SO₄, HCl, K₂SO₄**).

By integrating production with supply chain control, we ensure bulk availability, consistent quality, and on-time delivery enabling uninterrupted operations for our partners.

PRODUCT PORTFOLIO

World Acid solves a critical industrial challenge: ensuring a consistent, high-purity chemical supply for nonstop operations. Through advanced in-house manufacturing and strong supply chain control, we deliver reliable, scalable solutions including Sulfuric Acid, Hydrochloric Acid, and Potassium Sulfate enabling industries to operate with precision and confidence.

- Sulfuric Acid (H_2SO_4) about 47,000 Tons/ Year
- Hydrochloric Acid (HCl) 36,000 Tons/ Year
- Potassium Sulfate (K_2SO_4) about 9,000 Tons/ Year

All products meet strict quality requirements and are supplied in bulk quantities with continuous demand to support large scale operations and incessant industrial demand.

SERVICES & SOLUTIONS

World Acid delivers end-to-end industrial supply solutions, including:

- **Bulk chemical supply & Contract Based delivery**
Structured supply contracts based on your consumption needs, with fixed or flexible capacity, defined delivery schedules, and priority allocation to ensure continuous operations.
- **Customized tracking based on client requirements**
- **Integrated logistics and Local & International distribution**
Full coordination of transportation from production to client site, including route planning, shipment scheduling, and handling of bulk chemical transport. We maintain oversight at every stage to reduce delays and ensure safe, compliant delivery.
- **Ensuring reliable procurement so your operations run continuously without disruption.**
Committed delivery timelines supported by production planning and stock availability. We ensure consistent, on-time supply with eventuality planning in place to minimize any risk of disruption.
- **Technical support and application guidance**
We provide specialized technical assistance, product selection support, application recommendations, and troubleshooting services to ensure our solutions are used effectively and deliver the best results for each customer's requirements.

OPERATIONS & FACILITIES

Our operations are built to support industrial-scale demand through:

- Strong distribution network across Iraq and the region
- Direct sourcing from in-house production facilities
- Efficient logistics and delivery systems

Our strong infrastructure ensures efficient, dependable, and large-scale chemical distribution.

SUPPLY CHAIN & INFRASTRUCTURE

World Acid operates an integrated supply chain, designed to deliver pace, reliability, and high-volume performance for industrial demand.

Integrated Network

- Direct factory sourcing & in-house production
- All-in-one flow from production to delivery
- improved stock positioning for continuous availability

Logistics & Distribution

- 16 tanker fleet (stainless steel & FRP)
- Local delivery within 24–48 hours
- Efficient routing for speed, reliable dispatch

Capacity & Reliability

- 92,000+ tons annual production for all products
- 6,800 tons storage capacity
- 99.5% reliability with 24/7 operations

This certificate remains the property of International Accurate Certification (IAC) to whom it must be returned on request. IAC accredited by UASL (England) UK

HEALTH, SAFETY, ENVIRONMENT (HSE)

Certified Quality Compliance:

Operations aligned with international standards, supported by certifications such as ISO 9001 (Quality), with documented policies, audits, and compliance records.

Closed-Loop & Emission-Controlled Production:

Sulfuric and hydrochloric acid production systems designed with closed-loop processes, gas scrubbing units, and emission control technologies to minimize or eliminate harmful atmospheric releases, supported by environmental monitoring reports.

Water Conservation Systems:

Use of condenser technology and dry cooling systems to significantly reduce water consumption, with documented efficiency metrics and environmental impact reports.

Operational Safety Systems:

Implementation of advanced plant safety measures including automated shutdown systems, pressure and temperature controls, leak detection, and emergency response protocols to protect personnel and surrounding environments.

Continuous Monitoring & Compliance:

Real time monitoring of critical parameters (emissions, temperature, pressure) combined with routine inspections, safety drills, and documented procedures to ensure consistent compliance with safety standards.

Responsible Operations & Traceability:

Full documentation of processes, material handling, and safety practices, ensuring traceability, accountability, and alignment with responsible industrial and environmental practices.

WHY WORLD ACID?

World Acid supports over 100 clients across oil & gas, power generation, and industrial manufacturing, with a model built around guaranteed supply continuity and logistics control in challenging operating environments.

- **Strategic Regional Presence** With branches in Iraq, Turkey, and the UAE, we are strategically positioned to connect key regional markets, ensuring faster delivery, reliable supply, and localized support wherever you are.
- **Supply Continuity Advantage:** 24/7 production with 99.5% uptime, ensuring continual chemical availability for critical operations
- **Integrated Production & Storage:** ~92,000 tons/year production capacity supported by 6,800 tons of strategically managed storage
- **Logistics Strength:** Dedicated fleet of 16 stainless steel and FRP tankers, enabling controlled, safe, and flexible bulk transport
- **Local Delivery Coverage:** 24–48-hour delivery across Iraq, including remote and high-demand industrial zones
- **Operational Reliability:** Zero recorded delivery incidents at client sites, backed by strict safety and handling protocols
- **On-Site Delivery Efficiency:** Advanced offloading systems allowing flexible tanker positioning and faster discharge at client facilities
